THERMFiT  

AFRICAANS

In vandag se mark is energie-effektiwiteit 'n buzz-woord vir bykans enige projek. Selfs as jy die beste vensters en deure installeer, kan jy steeds die energie-stryd in ander gebiede van die huis verloor. Deur ons toetsdienste kan u sien watter ander probleme u mag hê. Swak insulasie, gapings rondom pype en afsetpunte, vogpenetrasie en ander probleme kan jou deur- en vensterinstallasie laat lyk asof dit nie aan verwagtinge voldoen nie. Thermal Imaging word uitgevoer met 'n infrarooi hitte sensitiewe kamera wat duidelik toon gebiede waar die hitte ontsnap. Daar is baie areas van 'n huis wat groot hoeveelhede energie buit die vensters en deure verloor. Ons bied vertroulike pre-aankoop "Thermal Inspeksies & Vocht Surveys" en is gevestig in Nelson, maar reis die streek.

In today's market place energy efficiency is a buzz word for almost any project. Even if you put in the best windows and doors, you can still be losing the energy battle in other areas of the home. Through our testing services you can see what other issues you may be having. Bad insulation, gaps around pipes and outlets, moisture penetration and other issues can make your door and window installation look like it is not performing to expectations. Thermal Imaging is performed with an infra-red heat sensitive camera that clearly shows areas where heat is escaping. There are many areas of a home that lose vast amounts of energy besides the windows and doors. We provide confidential pre-purchase "Thermal Inspections & Moisture Surveys" and are based in Nelson but travel the region.
