THERMFiT  

INDONESIAN

Dalam kondisi pasar saat ini, kata "Buzz" digunakan hampir dalam semua proyek. Bahkan jika anda membuat jendela dan pintu yg baik sekalipun, anda masih bisa kehilangan energi di tempat lain.

Melalui layanan pengujian kami, kami dapat memberikan solusi terbaik menyangkut hal tersebut diatas. Isolasi yang buruk, adanya celah disekitar pipa dan saluran lainnya, penetrasi kelembaban serta masalah lainnya dapat membuat pemasangan pintu dan jendela sangat tidak memenuhi syarat alias berdampak sangat buruk.

Pemasangan thermal dilakukan dengan menggunakan kamera sensitif dimana melalui infra-merahnya bisa dideteksi area yang bocor.

Banyak area dirumah yang bisa menimbulkan hilangnya energi, jadi bukan hanya melalui jendela dan pintu saja.

Kami menyediakan sarana pra-pembelian

" Inspeksi Panas Dan Survei Kelembaban " yang kami jamin dapat dipercaya, dan berbasis di wilayah Nelson serta dapat melakukan pelayanan di wilayah lainnya.

In today's market place energy efficiency is a buzz word for almost any project. Even if you put in the best windows and doors, you can still be losing the energy battle in other areas of the home. Through our testing services you can see what other issues you may be having. Bad insulation, gaps around pipes and outlets, moisture penetration and other issues can make your door and window installation look like it is not performing to expectations. Thermal Imaging is performed with an infra-red heat sensitive camera that clearly shows areas where heat is escaping. There are many areas of a home that lose vast amounts of energy besides the windows and doors. We provide confidential pre-purchase "Thermal Inspections & Moisture Surveys" and are based in Nelson but travel the region.
